(literally, sky-wells, to indicate that they are dug to receive and preserve rain water). Most of these are ancient Roman pools which were claimed either by the government or by individuals, and are put into use again to store rain water. Recently, the government has erected a number of dams to preserve the rain water in exceptionally good years from flowing into the sea. All this, however, is not enough to provide the tribal population in the area with a permanent supply of water because of the limited capacity of the cisterns and the pools and the scarcity of rain and its erratic nature. Recent attempts have been made to tap the underground water in some parts of the area. A large number of wells were sunk, especially along the coast.

The economy of Awlad Ali is based on livestock husbandry, supplemented by occasional cultivation of barley. Owing largely to the variation in the amount of rainfall, the sources of food in the area have the important characteristic that the place and amount of their occurrence vary from one year to the next. Throughout most of the area, the tribal populations are concerned predominantly with warding off shortages in the food supply by moving with their flocks to areas where grazing lands are available.

Awlad Ali keep a variety of domestic animals, the most important of which, from the economic point of view, are sheep and goats. The economy of Awlad Ali is based on the utilization of the products of these two animals. These products are milk, meat, wool, and hides. Milk and its products constitute the basic element of the people's diet. Milk is never consumed fresh. It is always made into sour milk (maleh), kishk (dried milk), or butter.

Cases

829 is to constitute a viable economic unit; and if it is to expand, the number
594 of males must be increased disproportionately compared with females. Since
562 the structure of this "ideal family" (which in the sentiments of the Bedouin
858 is the only family) is based on the division of labour, some details of the tasks and their allocation among members of a family are included to estimate the importance of this notional "ideal family."

The Division of Labour, by Sex

462 The tasks women perform are almost entirely associated with the tent.
286 They make the tent top, and the gaily coloured carpets which cover the sandy ground in the men's quarters. They also weave the material for making sacks, and nose bags for horses and camels. Throughout the year a piece of weaving is always on the loom waiting, and while any women of the tent may take a turn at weaving, the mother decides what is to be made,
462 its pattern and colours and in general directs operations. Women also pitch
342 the tent when the camp is moved; they do so unaided by the men. It is a task which requires considerable strength and only grown girls and mature women can assist in this; younger girls scour the vicinity in search of stones to hold the sides of the tent on the ground after it has been erected.
[356] As soon as pitching is complete, the floor of the tent is brushed clean before carpets are spread and the few articles of personal belongings placed in their proper position.

462 Next, brushwood must be fetched in large quantities for fires. Apart
313 from cooking needs and winter warmth, the fire of each tent is in constant use for preparing the sickly sweet tea, almost the consistency of syrup, which is drunk several times a day regularly and which is made again for even the casual visitor. The task of fetching brushwood is performed daily, and each load takes a few hours of a woman's time to gather and bring back
[412] to the tent. Bushes are uprooted with the aid of a long-handled adze and piled together, to be carried on her back for the homeward-journey. The load is cumbersome and heavy; only girls in their late teens and mature women can cope with it.

462 All cooking is done by the women. Most meals consist of cereal dishes of
252 various sorts, so that grinding, using heavy millstones, is a perpetual ac-
412 tivity to satisfy the demands for large quantities of flour. Millstones are bought in the villages. In most small camps there only one or two sets, so they are passed round from one woman to another. The stones are very heavy but when they are carried from tent to tent men offer no assistance.

462 Each tent also requires large quantities of water for human consumption.
312 If the camp is located near a well, water is drawn in small quantities, frequently. Young girls and boys take a donkey to the well, fill a couple of
[492] jerry cans with water, wait for an older sister to load them on the donkey and then drive the beast back to camp. After a fall of rain, while puddles of water remain on the ground, mature women make haste to gather the

Cases

462 424 them or any innate aptitude for them; this insistence is an index of the jealousy with which she is prepared to guard her rights. Each right derived from this or that small task is an extension of her control over the male.

462 424 • 252 [593] The force and significance of this control is, perhaps, best seen in a woman's right to cook. At marriage a woman must have at least the minimum of cooking utensils, and one of the rights a man acquires in a woman is that she cooks for him. This is something a man cannot do for himself. Therefore, when a man ill-treats his wife or threatens her with divorce, she can retaliate by refusing to cook, or leave the tent altogether to return to her father. A man bereft of this service is in a very sorry plight indeed. The legal dominance of the male, seemingly autocratic, is reduced at every point by the control a woman exercises through her exclusive right to perform tasks. The limits to the area of her coercive powers are significant. They are confined almost wholly to domestic relationships. Legally, women 562 suffer such disabilities that they are almost of the status of minors; in reality, their day-to-day living is far from intolerable because they are able to control males over a wide field of relationships.

462 424 231 Men, excluded in the main from domestic duties around the tent, perform tasks to which their legal rights are tied. While women have access to wells for water used by human beings, the transport of larger quantities of water over longer distances, requiring the use of camels, is a task which falls to the men. Watering of animals is done by men. Only they can slaughter the animals for food. The meat of an animal slaughtered by a woman is not "free," in a ritual sense, for human consumption. In an extremity only, a woman can, in effect, kill an animal, but the knife which cuts its throat must be held in a male hand, even if it is the hand of a very small boy. The exploitation of the land is also the male prerogative. They [462] [424] [241] plough and sow the grain; incidental help may be provided by wives working alongside their husbands during the early part of reaping, but the main reaping is done entirely by men. Transportation of grain to the mounds is also carried out by men, and it is they only who have access to the grain stores when quantities are withdrawn for family use. Sheep-shearing is [236] [432] carried out entirely by males,[10] the fleeces are stacked by them and the distribution and sales of these is directed by the male head of the tent.

Additional to these major tasks which males undertake are a number of minor ones. Men sew strips of cotton together to make clothes for both sexes. They also make rope of grass, albeit in a desultory sort of way, by twisting together the strands between the palms of the hands. A number of [834] other tasks fall to the men by virtue of the fact that the sexes are separated [342] in the tent by a divider of blanket material, which may be taken down when only members of the elementary family are about, but which is put

[461] [533] [538] [831] [10] This work is reserved for the younger men and takes the form of a festival during which lewd songs are sung and poems with obscene themes or references are recited loudly and within the hearing of elders, in a manner not dissimilar to the behaviour of bachelors at a wedding.
